	Examiner Tuan C. To	Art Unit 3663	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2, 4-8, 31, and 32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 31, each recites the limitation "assignment" in the claim. There is insufficient antecedent basis for this limitation in the claim.

Claims 1 and 31 recites "grid segment visiting frequency represents a comparison between a number of stops in said grid segment by said driver during said reference period and a total number of stops by said staff of drivers during said reference period". It is unclear how such the comparison can be done during a reference period.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Art Unit: 3663

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1, 2, 31, and 32 are rejected under 35 U.S.C. 102 (b) as being anticipated by Westerlage et al. (US 5970481A).

Westerlage et al. teaches a system/method of optimizing a route plan having a plurality of routes within a service territory comprising: dividing said service territory into a plurality of unassigned cells (figure 2, each region is divided into a plurality of unassigned cells), wherein a subset of said unassigned cells is associated with a grid segment (figure 2, 1, 2, 3 are subset of said cells); identifying from among a staff of drivers a most frequent driver for the grid segment based upon a grid segment visiting frequency calculated for said grid segment and each of said drivers during a reference period (figure 1, dispatch 30 monitors the position of vehicle 20 in specified region via the information received from the mobile unit 22 of the vehicle 20), and classifying said subset of said unassigned cells associated with said grid segment as a core cell and assigning each said core cell to said identified most frequent driver (column 10, lines 37-49), if said grid segment visiting frequency calculated for said cell and said most

Art Unit: 3663

frequent driver is greater than said minimum grid segment visiting frequency limit,

Allowable Subject Matter

Claims 4-8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
